

Alderman Geenan MURT Project Update for the week of May 1, 2014

Alderman Geenan MURT Update for May 1, 2014

One of the last stages of the construction project will **begin today**.

The contractor plans on starting asphalt work on the south side of Brother Geenan Way today. They will be widening the pavement, creating parking spaces and installing landscaping.

The traffic pattern will remain as it has been, with one lane open to traffic in the East Bound direction only, from Osprey Ave. to US 301.

The lane that will be open to traffic will be shifted to the edge of the new curb so the contractor will have room to construct on the south edge of the roadway.

The Maintenance of Traffic will be shifted today and this new configuration is anticipated to remain until the project is completed. Flagpersons will be on hand to assist motorists with the change in the lane usage and facilitate a smooth transition.

As always, thank you for your patience and cooperation.
